

Jet mod. TI-150

Our **Jet** dyeing machine **TI-150** is one rope dyeing machine, with 150 Kg of loading capacity, designed to process all kind of woven and knitted goods, specially those one of high shrinkage degree or very sensitive to marks and creases formation without pre-setting and very short liquor ratio.

☒ Main features:

1. **One single rope** of maximum 1.000 meters inside the chamber allowing **natural shrinkage** of the fabric during all the process.
2. **Horizontal-Inclined chamber** allowing **very short liquor ratio**.
3. **Automatic fabric speed regulation** allowing the synchronisation between the inner reel and the fabric speed.
4. **Loading** and **unloading** operations are done **very easy** from the frontal side of the machine.

Jet mod. TI-150

☒ Advantages:

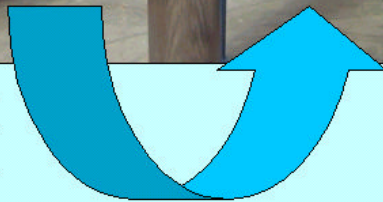

1. **Electrical energy great savings** per kilo of processed fabric.
2. **Water great savings** consumption per kilo of fabric.
3. **Steam great savings** consumption per kilo of fabric.
4. **Dyestuffs great savings** per kilo of processed fabric.
5. **Great savings in chemicals, water and steam consumption** due to the very low liquor ratio.
