

SOFTWARE AUT-3000

Beam Dyeing Control

We supply one *Industrial PC* to control all the parameters during the *dyeing* and *washing* process.

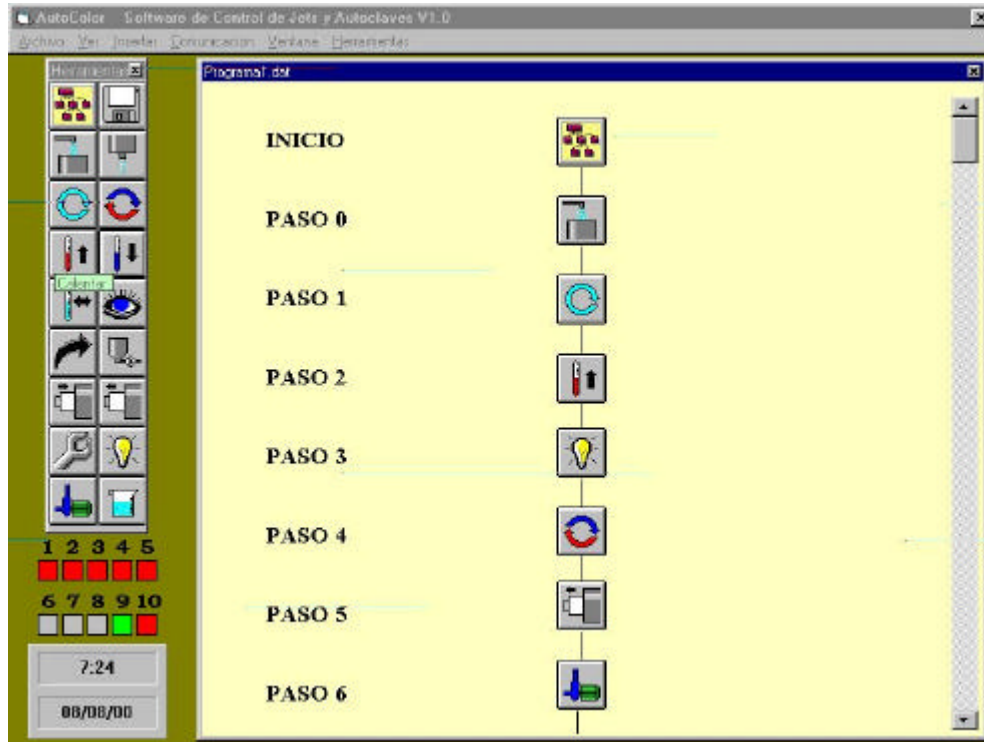

One tactile screen and one specific software allows us the full automatic control of the machine.

The *main characteristics* are:

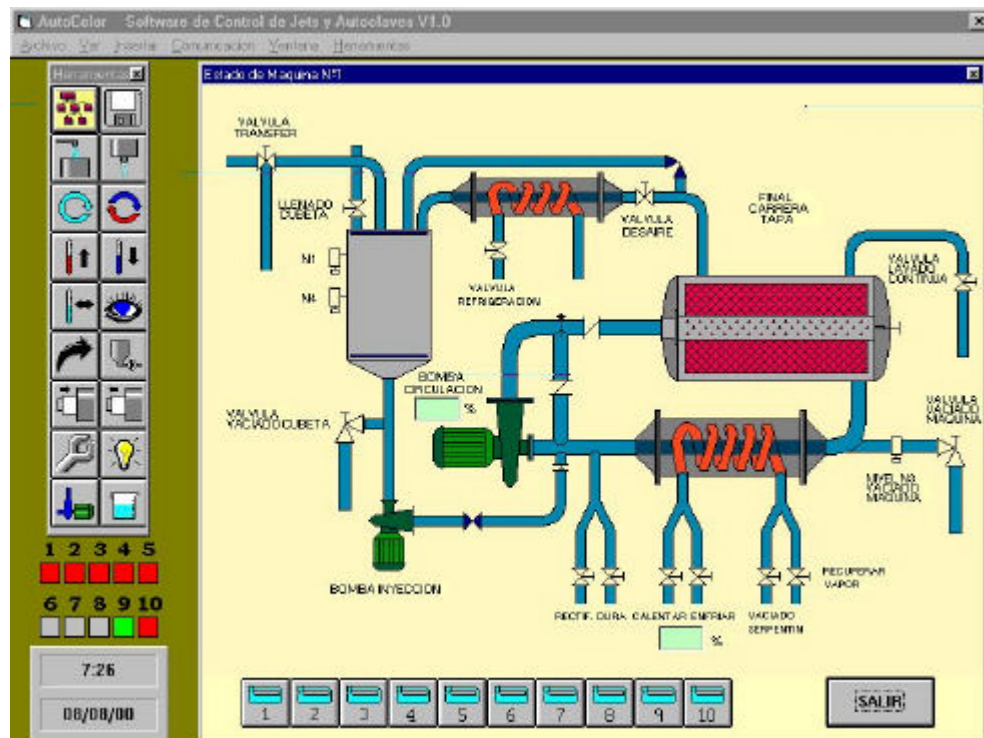

- One *microprocessor* for the full process control.
- One *interactive programming* system with icons.
- *Storage* and *edition* of the parameters.
- Screen showing all the machine *parameters in real time*.
- *Easy access* and *quickly* operation.
