The K-Multiprocess stabilizing machine is highly innovative and versatile due to the possibility of treating:

Flat woven, brushed or carded, of the traditional wool type, either 100% wool or blends, such as wool-polyester, wool- silk and others.

Cotton fabrics

Mesh fabrics in all possible types of natural fiber, such as cotton, wool, etc., or artificial and synthetic fibers such as polyester and nylon, as well as elastics in general and the entire range of mixed fibers.
